

# Regional Tourism Satellite Account

## Gold Coast 2013-14

In 2013-14, the tourism industry contributed an estimated \$4.9 billion to the Gold Coast regional economy (16.7% of gross regional product) and directly employed approximately 30,400 people (11.1% of regional employment).

Tourism Satellite Accounts (TSA) evaluates the tourism industry activity and performance within a national accounting framework. The regional TSA measures both the direct and indirect impacts of tourism on the economy and includes metrics such as Gross Value Added (GVA), Gross Regional Product (GRP) and employment. It also provides information about tourism consumption, output, taxation and the composition of the tourism industry and its interaction with other industries.

This Gold Coast regional profile ranks the economic contribution of tourism to the region both in absolute level terms and as a contribution to the regional economy. These measures are directly comparable to State, National, and indeed, international Tourism Satellite Accounts.

### Key aggregates

In 2013-14, the tourism activity in Gold Coast generated:

#### Tourism output

- \$4.5 billion and \$5.0 billion in direct and indirect tourism output, and \$9.5 billion in total tourism output.

#### Gross Value Added (GVA)

- \$2.3 billion and \$2.1 billion in direct and indirect tourism GVA, and \$4.4 billion in total tourism GVA.

#### Gross Regional Product (GRP)

- \$2.5 billion and \$2.4 billion in direct and indirect tourism GRP and \$4.9 billion in total tourism GRP; and

#### Employment

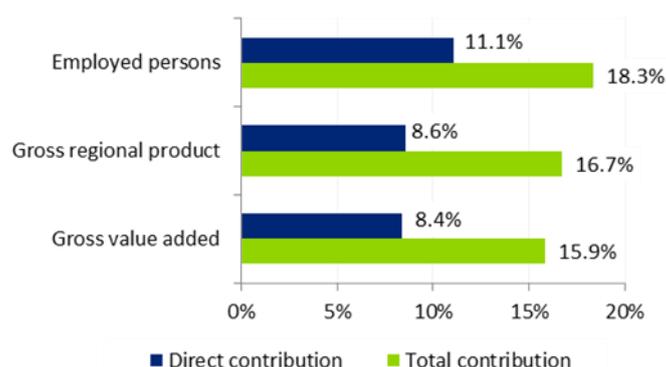

- 30,400 jobs for people employed directly by the tourism industry, 20,000 indirect jobs and a total employment impact of 50,400 people.

### Economic importance of tourism in the region

The ratio of Gold Coast's direct tourism contribution to the total regional economy aggregates provides a point of reference snapshot for the importance of tourism to the region. In 2013-14, it is estimated that tourism directly represented 8.6% of the total Gold Coast economy (in GRP terms), compared to 4.9% for regional Queensland.

Due to the region's reputation as a tourism hotspot, Gold Coast ranked 3<sup>rd</sup> overall in the comparative importance of tourism across Queensland's regions, and 2<sup>nd</sup> in overall industry size; supplying 23.4% of the state-wide contribution of tourism.

<b>Total impact</b>		<b>9,465</b>	<b>4,351</b>	<b>4,892</b>	<b>50.4</b>
<b>Total economy</b>			<b>27,441</b>	<b>29,280</b>	<b>274.9</b>

# Research factsheet - Value of tourism to Gold Coast

## Tourism related industry profile

At the industry level, the tourism products that contributed the most to tourism consumption in Gold Coast in 2013-14 were: (1) \$1,034m on long distance transport; (2) \$979m on takeaway and restaurant meals; and (3) \$789m on shopping.

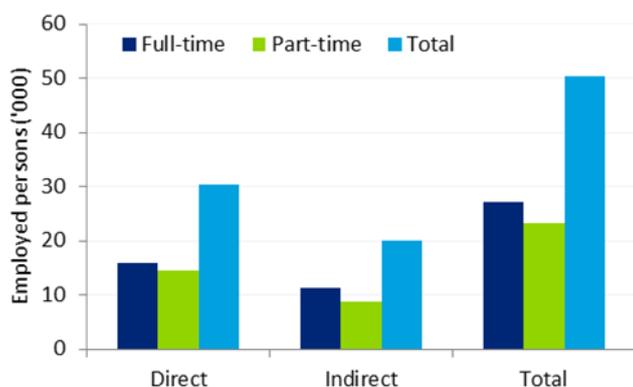

In terms of overall economic contribution, the tourism industries that generated the highest economic benefit to Gold Coast in 2013-14 were:

- Accommodation with \$509 million in direct GVA and \$561 million in direct GRP;
- Ownership of dwellings with \$304 million in direct GVA and \$332 million in direct GRP; and
- Cafes, restaurants, taverns and pubs with \$289 million in direct GVA and \$319 million in direct GRP.

## Tourism employment

The TSAs define tourism employment as the number of tourism employed persons. In 2013-14 there were 30,390 persons (made up of 15,850 full-time and 14,500 part-time) directly employed in tourism in Gold Coast.

The tourism related industries that contributed most to regional tourism employment in Gold Coast in 2013-14 were:

- cafes, restaurants and takeaway food services (2,830 full time and 5,190 part time employed persons);
- retail trade (2,480 full time and 2,590 part time employed persons); and
- accommodation (2,770 full time and 1,690 part time employed persons).

## Regional tourism profile

In 2013-14, visitors to Gold Coast contributed a total of \$6.3 billion in tourism consumption to the Gold Coast economy. The majority of visitor consumption in the region was contributed by domestic overnight visitors (\$4.2 billion). In relative terms, domestic overnight visitors to Gold Coast spend the most per night (\$293) on average.

Table 1.2: Tourism activity summary

Visitor segment	Nights ('000)	Nights (%)	Consumption (\$ million)	Consumption (%)	\$ per night
Day-trippers	6,710	23	798	13	119
Domestic overnight	14,256	48	4,174	66	293
International	8,599	29	1,356	21	158

## Methodology

Tourism and Events Queensland has worked with Deloitte Access Economics to produce consistent and comparable regional Tourism Satellite Account (TSA) estimates of the value of tourism to Queensland's regions.

Tourism Satellite Accounts are used to estimate the contribution of tourism to a region by combining the contributions of the various goods and services that make up the industry. The regional, state and national estimates are based on an internationally recognised and standardised framework (although regional TSA methodology has been extended to determine the indirect impact of cross region trade flows).

There are a number of steps required to calculate the tourism industry's contribution to Gold Coast's economy. To start, a regional tourism consumption bundle is derived from TRA visitor survey data and adjusted to remove any price effects that are not directly attributed to the seller of the good or service (e.g. taxes, transport margins, pre-manufactured inputs etc.). The direct and indirect contributions of tourism are estimated by using regional input-output multiplier tables, derived from ABS data.

For consistency and assurance, the regional results are calibrated against the reported 2013-14 state TSA data.

## Tourism Standard Reporting

For consistency in reporting, when referring to the overall size or contribution of the tourism industry in a region, the appropriate measure is GRP. GVA should be used when comparing the tourism industry against another industry within the same region.

## Glossary

**Direct contribution of tourism:** The contribution generated by transactions between the visitor and producer for a good or service that involves a direct physical or economic relationship.

**Indirect contribution of tourism:** The subsequent flow-on effects created by the requirement for inputs from those industries supplying goods and services to visitors. For example, in the case of the hotel industry this might include the fresh produce supplied to a hotel and the electricity used.

**Input-output table:** An input-output table is a means of presenting a detailed analysis of the process of production and the associated use of goods and services and income generated. National input-output tables are produced annually by the Australian Bureau of Statistics.

**Tourism gross regional product:** Tourism GRP is tourism GVA plus net taxes on products that are attributable to the tourism industry. As such direct tourism GRP will generally have a higher value than direct tourism GVA. Direct tourism GRP is a satellite account construct to enable a direct comparison with the most widely recognised national accounting aggregate, gross domestic (or regional) product.

**Tourism gross value added:** Considered the most accurate measure of the contribution of the industry to the economy. It includes the total labour income and capital revenue received by the industry and the net taxes that government received from the production. This measure is directly comparable with the value added of 'conventional' industries such as mining and manufacturing and can also be used for comparisons across countries.

**Tourism output:** The total value of goods and services produced in Australia to satisfy visitor consumption. It is measured in basic prices, so it excludes net taxes on tourism products.
